

## CertifyID BlackBox™ - 2007 Edition

### Easily deploy trusted digital identities on your Microsoft Server platform

In today's always online world, managing your digital identity and securing your transactions has become indispensable.

However, internet fraud, spam and phishing are an increasing burden on corporate and individual users alike, and significantly increase the risk and cost of doing business electronically. Technology-centric user identification is not enough. Trusted authentication is key in enabling secure digital transactions of any kind.

- ✓ Secure e-mail
- ✓ Digital signatures
- ✓ Document encryption
- ✓ Secure network communication
- ✓ Secure access control
- ✓ SSL Enabled Secure Servers

With CertifyID BlackBox™ 2007 Edition, unlock the true power of your internet strategies by enabling cost-effective e-security based on eIDs.

### e-ID is about Trust

This is why WIS@Key is offering a unique set of easy to implement technologies, professional services, as well as a Trusted Digital Identification Backbone™ to transform the Internet into a trusted channel for electronic transactions.

### CertifyID BlackBox

The CertifyID Blackbox™ 2007 Edition is a unique product offering a complete and affordable out-of-the-box solution for establishing a Trusted Identity Infrastructure dedicated to your organization.

The CertifyID Blackbox™ 2007 Edition allows your organisation to join WIS@Key's Global Trust Model and immediately enables trusted digital signatures, trusted and secure email, web sites and communications.

The CertifyID BlackBox™ offers a secure and trusted platform upon which your organization can enable additional trusted applications.

### Trusted Foundation

The CertifyID BlackBox™ offers a secure and trusted platform upon which your organization can enable additional trusted applications:

- strong authentication and access control to desktops and servers
- secure electronic document management and workflow
- secure billing presentation and payment
- and more...

### Windows Server 2007 ready

The CertifyID BlackBox™ 2007 Edition provides the following additional benefits:

- software upgrades to BlackBox Windows Server 2008 components as released
- support for CardSpace on Windows Server 2008
